Ms. Nishu Tyagi, New Delhi

Mr. Shiv Mishra, Uttar Pradesh

Tele-health Orientation and Network Set Up to manage the COVID 19 national emergency

(Under the aegis of Telemedicine Society of India (TSI), supported
by DHIndia Association and stalwarts of the Digital Health
Community of India).

With the impending onset of Phase 3 of Covid 19 , we need to gear
up as quickly as possible to handle the large number of
consultations that may be required. 80 % of the cases are expected
to be mild. It is essential that these mild cases as well as the
remaining 20% requiring close management, be identified as soon
as possible. It is also necessary to provide Remote Health care to
non COVID conditions. **It is essential that this triage be done
remotely as physical visits to a hospital itself increases
risk of infection .**

**Tele-health consultations done by competent trained
clinical personnel assisted with approved authorized flow
charts and protocols will go a long way in managing the
pandemic should it come.**

Several studies indicate that by April 7th there could be an
exponential increase in numbers . It is imperative that at least
100,000 registered medical practitioners be quickly oriented to
basic tele-health methodologies, within the next week to ten days.

TSI in collaboration with the digital health community and DHIndia
Association, worked on a war footing to have the guidelines for
Telehealth approved. Furthermore, an online basic Tele-health
introductory orientation come training program , followed by on-
boarding on to the Tele-health network, is to commence by April 1.
This is a pan India effort.

Contact: Telephone +91 522 2668838, +91 522 2495530

Fax: +91 522 2668893 email: contact@tsi.org.in, hon.secretary.tsi@gmail.com & joint.secy.tsi@gmail.com

Website: www.tsi.org.in

Various teams are handling major tasks such as :

1. Approval of the guidelines and mandate to carry out the training and deployment of the network
2. Orientation, flowcharts and protocols compilation
3. Enrolment Drive
4. Infrastructure and tools
5. Training and orientation set up
6. Deployment and Go Live of the network.
7. Post Go Live support

The project is on track and training should begin around April 1. Go Live of the Tele-consults is expected to start from April 7.

We request all Doctors (courses for other Clinical staff will be done later) to come forward for this short online orientation and volunteer to handle the Tele-consults subsequently , even part time.

To enroll for the online orientation and training please fill the form by visiting the link below
